**IV Therapy Set**

*Change Frequency*

**Continuous/maintenance:**
- **General Solution:** Q 72 hours

**Intermittent/cyclic:**
- **General Solution:** Q 24 hours

**Set Change Frequency**
- By Solution Type:
  - **Continuous**
  - **Intermittent/Cyclic**

**TPN:**
- Tubing: Q 72 hours
- (solution: Q 24 hours)
- Q 24 hours or at end of cycle

**Lipids:**
- Q 24 hours
- Q 24 hours or at end of cycle

**Blood Products:**
- Q 4 hours

*Set = IV bag/bottle and tubing (and filter as applicable),

**Continuous** = Replace administration sets, including secondary and add-on devices at 72 hours.

**Intermittent** (if disconnected from the primary line)
- if infusate is administered intermittently, regardless of add-on devices, change sets every 24 hours.

**Note:** The only medications that may be given continuously and require more frequent tubing changes than 72 hours, are lipids and lipid emulsion medication like propofol which are every 24 hrs.
